roundcube
open source webmail software

How-to Wiki

Roundcube Webmail Installer

1. Check environment	2. Create config	**3. Test config**

Check config file

defaults.inc.php: **OK**
config.inc.php: **OK**

Check if directories are writable

Roundcube may need to write/save files into these directories

/var/www/htmlm/temp/: **OK**
/var/www/htmlm/logs/: **OK**

Check DB config

DSN (write): **OK**
DB Schema: **OK**
DB Write: **OK**
DB Time: **OK**

Test filetype detection

Fileinfo/mime_content_type configuration: **OK**
Mimetype to file extension mapping: **OK**

Test SMTP config

Server	localhost
Port	25
Username	(none)
Password	(none)

Sender   gaurav@webterse.com

Recipient   gauravch67@gmail.com

Send test mail

Test IMAP config

Server	localhost ▼
Port	143
Username	gaurav@webterse.com
Password	

Connecting to localhost...
IMAP connect: **OK** (SORT capability: yes)

Check login

After completing the installation and the final tests please **remove** the whole installer folder from the document root of the webserver or make sure that `enable_installer` option in `config.inc.php` is disabled.

These files may expose sensitive configuration data like server passwords and encryption keys to the public. Make sure you cannot access this installer from your browser.
